- ± 20
+ 40
++ 60 mg 11.25 AM [0:00] AFS Oct 26 1976 [0:50] 1st notes - pleasant window - [1:00] blend of both worlds (5 straight, 1 window) - I would rather the other way about - but I can at least make sense on the phone. [1:55 - 2:30] protein bits of erotic fantasy, and fantasy about fantasy - a sensory physical window. [3:30] largely closed - all in all a fine experience - I would not be offended at 2nd effect - lets go to 60 → 80 MDMA is somewhat less potent. MDA asserts its sensual nature, MDMA lets you do the counting. Both are delirifed.
- ++ 80 mg 12:00 noon [0:00] AFS Oct 29 1976 [0:40] unscheduled - first hints [0:50] such a gentle and friendly hallucination. MDA is a friend. [1:30 - 2:00] steady & holding. Blue song making his break at the top of the dead tree near the lake killed the valley & more! ~~Be~~ Erotic without being aroused! [3:40] tapering off. The whole experience was totally unworkable, assume plausible, dream conceivable. [6:00 - 10:00] slight unredeemable - a lingering effect. As if my glasses were slightly askew
- +++ 100 mg 12:15 noon [0:00] AFS Nov 12 1976 [0:35] - first trace of window and gradient from [0:35] to [1:00] to get complete. Some visual cloudiness on periphery. Erotic again, but substantially unobtainable? (2:30) referring. [3:10] largely out. Throughout evening - no appetite at all (modest helping → stuffed feeling) and some leg pain as if I had hiked a few miles yesterday a little reluctant to be gritty at [10:00] still. No difficulty sleeping. Still unobtainable in AM however!
- +++ 120 mg 9:20 AM [0:00] AFS Jun 25 1977 [0:22] 1st window [0:30] coming on strong - slight nausea [0:32] more so - several compulsive surges. [0:40] dilation considerable - still nausea - SKLT when walking. [0:44] time slowing [0:55] behind lab. fire started in lab - went to add fuel, still it's just started. I am +++ [0:55] mental time slowing [1:10] this is a people-dry. [2:10] want call - emerge OK and relax back in OK. [2:25] drooping? [3:00] completely unobtainable but cont. orgasm - excellent [3:40] drooping [4:30] all gone except for beautiful grandy.
- + 200 mg 9:20 AM [0:00] 5/27/77 [0:30] start [0:45] development well underway (1:00) window controlled - full + - at club - walk to PAMS - bike - physical courses run - [2:00] clearing [2:20] out except for both chairs - this persists until [12:00].
- +++ 120 mg 9:30 AM [0:00] 6/21/77 [0:23] 1st warning [0:25] start window [0:28 - 0:40] rapid development to hills! - returned grave - inner change but OK some hints of nausea up to +++ by [0:50] [1:30] still +++ [2:00] +++ +++ [2:45] drop to ++, out [4:00] still +, able to yell a to rest [7:00] clear window [10:00] still +++
- +++ 160 mg 9:05 AM [0:00] 6/24/77 [0:10] not in eye [0:15] start window [0:20 - 0:40] rapid development into eye crinkles. Drowsy would be difficult here. At later full, OK. Compulsive drowsy. no nausea - no vegetable. [0:40] development! time very slow [1:00] full +++ drowsy [1:30] still [1:40] start down? [2:00] + 40 mg - no more window, but inner inter [3:00] + 40 mg Σ 240 more teeth down [3:30] more development. [5:00] drop - still both chairs [7:00] still OK - like 200 mg left

N-Ethyl-MDA
"MDE"

- 20 mg 11/30/76 - ATS 9:15 AM 5 mg + 15 mg at 10:45 AM. - no effects whatsoever.
- 40 mg 12/11/76 - ATS 10:55 AM - five tabs. n.e.
- 60 mg 12/13/76 - ATS 2:45 PM - slightest hint at [0.5]? - no effects.
- + 80 mg 12/18/76 ATS 10:50 AM - [0.30] first window - interesting - but not MDMA. I feel as if I am looking at the world c/popped eyes [1:25] still st. threshold (10:2) [2:10] completely clear - all was a slight but real threshold. at [8:00] a little stary - as if ^{THROW UP} awake for 24 hrs - perhaps just the coughing from my cold.
- ++ 100 mg 12/23/76 ATS 9:55 AM - no orange juice [0:23] 1st hint [0:25] rapid buildup [0:42] address to the MDMA problem c/h. - warm light all around me. [0:50] ~ 50% into it. The drug does nothing but change the state - everything that occurs, in being into it. As intense or as dull as we choose to make it again - like the alcohol drink. (1:25) drooping off - already - at [2:30] complete, clear - can't talk. in vesicle! This is about as active, or somewhat less active, than MDMA, and somewhat faster st. threshold than V. Simons
- + 100 mg 5/17/77 ATS 9:10 AM [0:23] warning [0:25] start from [0:50 - ~~to~~ to 1:40] steady at + one. [2:00] drooping. exp. Teller Bob 2/11/77 MDE more amphetamine like than MDMA
throw.
- + 120 mg 6/12/77 ATB 2:15 PM [0:50] some little thing [1:00] am at + but it was absolutely quiet getting there (250 mg Lofepipromazine) [1:40] still + [2:00] what little I had is disappearing [3:00] clear except in a little jaw. + one at worst.
- + 140 mg 5/2/77 ATS 9:33 AM [0:00] about at [0:20] start at [0:35] - develop to [1:00] which is +. some teeth chatter pulse 80 [1:12] clearing [2:00] clear.
- (±) 160 mg 5/4/77 ATS 4:00 PM only ± at 1-2 hrs - previous history: food - dicelets at [0:15]; ptyalo great - eff. five 4-20 200mg on 5/3, tolerance 140mg on 5/2 - no conclusion from all this - also see p 244, 245.
- ++ 200 mg 8/7/77 ATS 10:45 AM [0:00] [0:20] alert - flat until [0:30] - then a smooth simple develop. went to [0:50] at a ++. Some 20 shakes, eyes dilated, some seeing problems, [1:15] lunch - no appetite [2:00] rapidly drooping. [3:00] quite relaxed. at [3:35] 60 µg LSD g.v. ¹⁰⁰ 234 24
- + 200 mg 3/18/77 ATS 10:45 AM [0:00] [0:30] alert - develop from [0:35 to 0:50] → + motor only - by [2:00] clearing is rapid [2:15] a little physical left. at [3:00] 60 µg LSD g.v. 247
- ++ 280 mg 2/7/78 ATS 10:15 AM [0:00] ~ 200mg. [0:10] microscopic alert [0:30] began to a very simple window ++ at [0:45] [1:00] some eye-throw - dilation [1:30] drooping? [1:45] yes. [2:00] + 80 mg [2:15] increased jaw clench, more eye problems [2:35] mental effects recurred but barely to a +. Physical problems are definitely increased. Writing is poor - quite drunk-like [3:15] out - see 256 for LSD experimentation.
- + 200 mg 5/11/75 4:25 PM [0:00] [0:20] alert at [0:40] start in eyes - to [1:00] a + - not the impact of MDMA, but ± 120 mg - at [1:40] almost clear - experimentation c LSD g.v. 267.

of feelings is easier.

The most important effect is however the balance, the feeling of to be between two worlds, the window effect, the feeling (after you has passed the window) that you can look to the world like from a airplane, and in the same time the possibility, to be really in the middle of a forest: the possibility to shift to different levels of perception, feeling, thoughts.

You can handle the drug and not the drug you.

(no appetite at all)

FOLDOUT BLANK

Denise
11/24/76

time course: after 20-30 min first effects
 ~ 40 min ~ 50%
 ~ 1h - 1.5h 100% for 3h
 ~ ~6h ~ 50%
 ~ ~12-20h ~ 10% (hydrophobic effect)

units: ++!

Enhancement of mostly tactile ^{and visual} perception. The perspective is the most change phenomenon: like a wide-angle lens ($f \approx 35$) (Perspective $f \approx 28$) you see deeper, more distant and during the same time the total f -ex.

Proton-light increasing with 30-70% color increase.

A very heavy resonance through the total body-apparatus = skull? = skeleton? Every step has his resonance through the total body.

During half-time a musical input is to much. All notes are louder, the normal tactile threshold is lowered.

The body is nearly without weight, there is no effort to stand up or walk around.

The heart circulation is increased, to the result is a pleasure feeling. The erotic - not sexual - feeling is increased; personal contact, expression

Trenise
2/27/76

Ting

time course: after 20 min first effects
 " 1h 100% for ~ 3-4h
 " 6h ~ 20-30%
 " 7h ~ 0

units + 1 (1 1/2)

Enhancement of mostly tactile, less
 olfactory or visual perception

visual: only light + shadow, no colors,
 however ~ 30% of blinker effect
 in line-shape-movements

tactile: the body is more divided in warm +
 cold zones; body sensations are enhanced,
 the resonance in the skeleton (skit) is the
 same like with all other substances

A lot of inner trembling (uncertainty) by
 touching something

In comparison to ~~the~~ HDMA (a homogeneous drug)
 + Zn-2C is less balanced, some properties are
 more enhanced, whereas other effects are
 missing. The window effect is not with both legs
 Ten Hand (with one/visual) still below the window
 (normal appetite + taste)

 - 8 mg -
 ± 10.4 mg ±
 ++ 16 mg ++
 + 16 mg +
 ± 24 mg ±
 ++ 30 mg ++ 2/19/77 9:00 AM: [0:00] [0:32] first subtle note [0:45] slow window level part
 very nice. (1:00) walk into window - but the slow coming on makes it (1) easily controlled
 and (2) difficult to quantify. I must be 50%. [1:15] exchange stopped - I am stable
 search for new inputs [2:00] steady, all awareness truly enhanced - it would be impossible
 for any person, at this level, on this drug, to have a bad trip. There is nothing disturbed,
 so there can be no misrepresentation as a result. No sensory distortion. [3:00] still
 full ASC, long talk - Gordon fun! [4:30] still full. This is a slow MDA - equivalent to 80 mg
 fully as controllable - a marvelous drug. Would be good for introducing a person to slow-on,
 slow-off. No apparent impotency (unlike MDA). [6:00] drifting - window pretty much gone.
 some MDA gitty remains. [7:00] clear except for some tooth-rub. (11:00) all clear.
- +++ 40 mg. 2/27/77 9:00 AM: [0:00] [0:30] note a trace high (or head) [0:45 - 1:00] window development
 slowly - occasional nausea [1:00 - 1:20] very smooth development of an ASC - I can
 surely do anything I wish (thru, count stand, drive) (getting to this state (not the
 state itself) was so smooth I could be missed. The state is unmistakable however
 [1:30] stretched feeling at eyes, above ears - as if eyes were popping - kind of a
 temporary oxygen feel - yet eyes are normal. This is continuous and nice. [2:00] of
 intense - and after for a while. [3:00] still clearly fully steady [5:00] some drifting
 [6:00] 60% veered - to SF (driving) but still some awareness of certain movement
 at recital [12:00] still residual tooth-rubbing. This is \approx 100 mg MDA but a longer than
 scale.
- ++ 50 mg. 3/30/77 9:00 AM: [0:00] (to estimate long-acting nature) (should be 2-30
 hr) to head [0:42 - 0:10] - complete development of ASC - slightly but not
 [1:30] fully steady. x!! yet I can control any nausea remarkably. (in the
 (venal sense) [3:00 - 4:00] lunch - still steady (I think or + it is a

In general one of the best things
is that of this drug is that it has
function - power "thinking-power". It goes
straight forward to your mind.

LD
Mescaline
mescaline
1000 →

You are not looking to a movie, to a
picture show, you are looking to
looking from an other point of view the pattern
of your own thinking is altered. At least one
result is that you are relativizing your old
positions. Has you had problems resulting from
facts earlier; "they get a smaller number", -
for the first time I felt the need to write down
my experience in our "book". The first sentence
which I wrote down was: "of course, I am still
under the effect of this substance, but for that
very reason I have the wish to write"

- Besides all this, it is an unbelievable experience
to discover, to learn the power of this
substance, together with the creator of
this "powder".

* still during the effects of the drug.

The first part of the paper is devoted to a discussion of the general theory of the subject. It is shown that the theory is based on the principle of least action, which is a fundamental principle of physics. The principle of least action states that the path taken by a particle between two points is the one for which the action is stationary. This principle is used to derive the equations of motion for a particle in a potential field.

The second part of the paper is devoted to a discussion of the application of the theory to the case of a particle in a potential field. It is shown that the theory can be used to calculate the energy levels of a particle in a potential well. This is done by solving the Schrödinger equation for the particle in the potential well. The energy levels are found to be discrete, which is a characteristic feature of quantum mechanics.

The third part of the paper is devoted to a discussion of the application of the theory to the case of a particle in a potential barrier. It is shown that the theory can be used to calculate the probability of a particle tunneling through a potential barrier. This is done by solving the Schrödinger equation for the particle in the potential barrier. The probability of tunneling is found to be non-zero, which is a characteristic feature of quantum mechanics.

The fourth part of the paper is devoted to a discussion of the application of the theory to the case of a particle in a potential well with a barrier. It is shown that the theory can be used to calculate the energy levels of a particle in a potential well with a barrier. This is done by solving the Schrödinger equation for the particle in the potential well with a barrier. The energy levels are found to be discrete, which is a characteristic feature of quantum mechanics.

The fifth part of the paper is devoted to a discussion of the application of the theory to the case of a particle in a potential well with a barrier and a well. It is shown that the theory can be used to calculate the energy levels of a particle in a potential well with a barrier and a well. This is done by solving the Schrödinger equation for the particle in the potential well with a barrier and a well. The energy levels are found to be discrete, which is a characteristic feature of quantum mechanics.

- + 30 mg 11:40 AM (5:00) 12/10/78 (1:00) slight alert [2:00] some alert - maybe + + - a gentle unresponsiveness - not clearly definable [2:00] + some in response to an odd uncertainty while driving - cleared by coffee. I must put this...
- + 40 mg 12:12 (6:00) 3/19/79 [0:40] alert [1:15] a subtle but real +, not interfering with actually helping! I am trained, little more. (2.00) stable. Use as per... to USS (b 280)

The main effect of the
... as a result of our talking
that the substance still more than 80% ...
in my head; that should be possible. That was
the introspection ... to work ...
... was the main feature

Although the thinking process was sometimes
not so straight forward as with 80%, however
... the pleasure and play of
thought ... intensity of thinking
... is very helpful for
the experience of yourself and the world ...
...
thinking pattern and ... to experience
with more freedom. Because of the ...
... of the outer world ...
... and ...
... it seems to me, that this
compound is a better possibility for a ...
... during a 'normal' week day.
The danger of a separation from body and
mind is not so large, because the body
feeling is always ... very good.
So, the dualism (the old one) from mind and
body seems to be non-existent any more for
my feeling very in part of one: want to create
more specific compounds)

This is mostly a personal comment; a more official

- + { 80 mg }
 +++ { 80 mg } May 2 1977 - 10:05 AM: [0:00] a challenge to body memory and to the
 + { 60 mg } ability to still pickup fuzzy threshold. [0:00] [0:25] early warning
 alert. articulate [0:30] slight effects. [0:45] 10-20% window [1:10] more
 a simple (+) - no more than 1+. [1:35] clearing [2:00] clear - no physical noticeable
 [2:30] + [0:50 mg] to challenge residue [0:35] aware of new window. [0:40] def.
 more than 1st time around at this level at this time. [0:45] extensive
 development - possibly ++? more extreme mydriasis now than 1st time
 (0:55) still ++ - quite a bit of teeth clench - more than before - probably
 could not time [1:05] at least ++ - but physical definitely more than
 before. bill in air, equate to 120 mg, with +++ . I must establish
 the 140 mg level for this experience as well as for the 70 mg "R" and "S"
 experiments [1:20] - no eyes closed - but some stop-motion on head
 bumps [1:30] mental receding. physical still there. [1:45] mental
 down more - physical persists. completely ineffect. [2:00] mentally
 almost out - physical down - mydriasis largely gone. [2:40] mentally
 clear. some physical still there. [3:00] [0:60 mg] = [0:00] [0:15] clear
 both mental and pretty much physical. [0:35] something comes? [0:45]
 up to + already - muscles - clench teeth - eyes - also building up. P.
 could be ± and is being kicked by the physical - no - it is really
 a +. [1:00] real +, also muscular tightness returns. I am
 hyper reflexive [2:00] mentally clear - physical residues. [3:15]
 something still lingers. [5:00] all traces gone - muscle and head.
 Clearly there is no short-term tolerance buildup - on the contrary, the
 second dose obviously builds on the first, even when there are no
 detectable effects remaining of the first. Also, the third on the
 second. Also note - total daily load (220 mg) was symptom-free
 at 5 hr after last exposure. No sleep problems. A busy day.
- +++ { 140 } May 7 1977 - + prepare for water-ski expts & for R & S isomers. [140 mg] at
 ++ { 60 } 9:45 AM = [0:00] [0:22] early warning, [0:24] unblat starts [0:27] rapid development
 I am at 20% [0:30] pulse 100 b.p. OK. [0:40] flat - must be 100% [1:15] still numerous
 still flat - quite alerted - some eye focus problem [1:35] drooping? [1:55] almost out - a
 little unblat clench. [2:30] mentally out - some physical part [3:00] eat lunch.
 [4:00] = [0:00] [0:60 mg] challenge. (0:24) new window. [0:55] ≈ 80 mg - full + [1:00]
 in window, but entry was quiet - I didn't see it coming. [1:15] slack to +?
 [1:25] "I feel that driver" - head effect rather than window. [1:45] clearing - eyes
 a little wobbly. [1:50] sober eyes a little crossed? last eyes focusing OK at [3:00]

- + 11 mg 5/21/77 ATS 9:55 [0.00] [0.35] start to [0.55] ± good interaction much less - clear at [3:00] - he by [4:00] experiment will
- + 120 mg 5/29/77 ATS 3:35 [0.00] [0.25] start - build up to 1 hr [4:00] 60 drooping? [2:25] clear. at [5:15] [0.00] - [0.00] [1:30] (new) ± don't see it - but I think it is there. As before - head effect rather than window - no muscle sleep
- ± 120 mg 6/4/77 CN 1:30 PM (with me, 50 mg "S")
- +++ 160 mg 6/10/77 after 72 hrs. clear 12.45 [0.00] - this to check against 50 mg, 100 mg "S"
 - ↓ [0.35] start at eyes - develop slowly [0.45] still decelerating [1:00] quite relaxed
 - ↓ Pulse 100 - development of just a window - nothing else. [1:00] complete some
 - ↓ stop motion in eyes. [1:30] full ++ or ++ quite unphobic but intellectually
 - ↓ alert [1:50] still there - good pulse [2:05] down a bit [2:15] down to + [2:30] drooping
 - 60 quickly [3:00] + [0.00] booster = ineffective amount [0.30] eyes again
 - [0.35] reacting to window - no rest, just development [0.50] pulse up
 - back up to + or ++. [1:00] more eye throw - most effects in eye & jaw
 - give it ++ [1:45] drooping - a little physical tension to [2:00].
- ++ 100 mg 6/13/77 new batch 2:25 10.45 AM [0.00] [0.30] aware [0.45] dual (most nice [1:00] honest + or even ++ - definitely more than MDE of yesterday [1:45] drooping but still there [2:30] substantially out - still aware of something [4:45] completely clear.
- + 100 [0.00] [0.00] 100 mg [0.40] aware - but no nose [1:20] still drunk - but is there any window [2:00] some eye inter - I am spacing - into x - but not window! [3:30] clear +
- 80 mg 6/14/77 10:44 [0.00] - first effects at just [0.30]
 - + 70 mg [0.30] [0.00] slow but real window development - to + [0.50] stable at +? - the second 40 hasn't come through yet? [0:55] developing a bit more
 - ↓ 70 mg [1:00] [1:15] deepening - 1st sign of muscular tension [1:25] just about to ++ some eye problems - not at satisfactory as all at once.
 - ↓ 70 mg [1:30] [1:35] more muscular pulse OK, bp. OK. eyes relaxed. I am ++ and ++ window versus air bit in the eye - there is a general interaction. I am complete in ASC conversion. Nothing more can happen. Mentally only +.
 - ↓ 160 mg [2:00] & 260 mg [2:25] up again [2:30] more. back to ++ [2:45] completely unphobic [3:00] completely unphobic - but not too windowed ++ [3:30] eyes still shut; maybe + [4:00] referring [4:30] trace yet of flunked - not yet out [1:00] residue - no problem sleeping at [12:00].
- + 120 mg 6/17/77 (see 230) - really 120' 2'' → 120 al. proper, unshakably. +
- 100 mg 6/18/77 15:15 with me 100 mg "S". +. Her own [0.30] [0.50] [0.50] that window is phobic - the machine [0:30] 3 machines [0:50] ++ [1:20] changes in flexion - some intense - some nervous. [2:00] quite relaxed - hot life = "100" - not 3' flush - window just relaxed - [7:00] hypoglycemic window in bed. Am - good sleep - relaxed in day. (low volume)

2-carbon DOET

cont. p. 329

- 5 mg 11:15 PM 5/23/77 [0:00] [2:15] something? - no - technical - n.e.
- ++ 10 mg 9:15 AM 70 mg 5/16/77 [1:15] starting - then hard [2:00] quite real - e. + but I am still developing [2:15] up to ++ I am pretty sure - no windows but strange sound. closer to LSD. [3:00] drive to Berk. like a dome in recap - smooth - must force good judgement [4:00] CN lecture - still ++ sound - [5:00] to +? am I dropping [6:00] largely out. strange day. I will give to a ++ but will be careful & layer cuts.
- +++ 10 mg 9:30 AM [0:00] 8/3/77 [0:35] first note - to 5% then flat [0:55] things now start - interesting - not MDMA noise - but not LSD sinister, quite, after. [1:10] at ++ - driving skills might be questioned; \cong 120 MDMA, \cong 80 MDA, \cong 30 mg MDM. some erotic. [1:15] still developing [1:25] some darting, & LSD undertones [2:00] permit things to flow - they do [2:15] up to +++ - not the best of times, but by no means the worst [2:30] +++ drive to Gladys for lunch. paired etc. [4:00] to ++ [4:30] to + [7:00] out except for teeth clench and some eye focus. At no point was CN in the edge of control - loss.
- +++! 20 mg 11:30 AM 10:00 4/25/77 Memphis. (0:45) first something - It is brittle & LSD-like. What is it? [1:00] fascinating stone - interaction might be interesting - but better become. [1:10] some abdominal cramp - writing bad - try reading [1:50] withdraw selfish - can't listen - must go - invade even to talk - Erin's face! Paul's behavior! [2:15] on lunch over - cork post, cheese - ^(3:15) completely out of control, \cong 250 - 300 mg LSD. I have creaked up I would devote myself to religion, if this was feasible. I must control. I am several slaters - I have made a fool of myself. Am I catalytically fixed? I am counting the minutes - entertainment very gone I cannot ~~down~~ go to sleep, as I could not ~~down~~ lose control of security
- [3:15] a nihilist illusion, consummated by a nihilist organism - a reader of nothingness which means that if I can conquer of such nonsense, I must be repairing, I hope. I am extremely scared, intellectually. Ed. help. This is not the alph game - this is the insecurity game
- [3:35] Oh again? - not ok again. was the Monet scene out of the window real? Still life? what an intellectually shabby way to commit suicide. Why not with a gun like ~~real~~
- [4:00] possibility of repair? - No, I have lost it again.
- [4:15] more ok than out, but when out, really out. The window is a secure game. fun. The death is an intellect game. Fine. This is stark insecurity. My father speaking to me in human, ready to us, with his clear patient voice - I was not hostile, just arrogant. I have destroyed ~~his~~ with my arrogance - must I destroy myself.
- [4:25] yet it is this very arrogance that has made me what I am. that has permitted discovery - invention. I have experienced the birth of it and the death of it. At the moment I am nervous, the central control of it.
- [5:00] leaving control. Not hungry. [5:15] rapid improvement - better now than when I went to lunch (at [2:00]). [5:40] I might almost try reaching into the kitchen.
- [6:00] try to talk to Greer ok. help with pie. Good appetite. Extraordinary day.

SASHA'S TENNESSEE EXPERIENCE

2.45 Lunch over. Lyna's backside! Child's face!

3.15 Completely out of control. About equal to 300 mites of LSD. I have cracked up. I must control. Am scared shitless.... I must try not to go to sleep, as I don't dare lose the visual connection to sanity. I see myself dying.

(SAW SELF AS OLD MAN DYING)

3.45 A nadir of nothingness. I am extremely scared. God help. The is the insanity game.

3.50 OK again? Not OK again. Was the Vermeer scene out of the window real? Still life?

4.20 This is stark insanity. My father, clear immediate, speaking to me in Russian, reading to me, with his patient voice. I am very little, sitting on his knee.

5.00 Recovering control. Know where I'm going. Not hungry.

5.40 Might almost consider venturing into the kitchen.

WDM - intrigued me because everyone who used it answered the question "what is it like?" in the same way "I don't know" "what happened" "nothing". And now I understand how answers. I too. Think nothing happened. But, Something seemed changed. Before the "winder" opened completely, I had some somatic effects - a tingling sensation in the fingers & temples - a special sensation, not distracting. However, just after that a slight ^{unpleasant} buzz similar to a little too much alcohol.

Subjective sensation that my hands were cold. Not certain when noise disappeared but all sensations were reduced when walking outside. The situation could be diverted from physical symptoms to outside, nature-oriented interest. The mood was light, happy but with an underlying conviction that something significant was about to happen - not base (or good either) for that matter, but just that something important was in the wings

2

Some procedure reminiscent, with Garcia

However the most notable detail experience was that of change in perspective both in the near visual fields & in the distance. Also the feeling that my usually poor vision for distance was sharpened. I felt I saw details on the distance that I could not normally see & the next day I confirmed that I could not see what I remembered seeing on the previous day.

After the peak experience passed - major somatic & psychophysiological state was one of deep relaxation. I, who can only barely tolerate having my feet touched, felt no sensation of being tickled about the feet. I felt that I could talk about deep or personal subjects with great profundity or special clarity and experienced some of the feeling one has after the second marathon. One is discovering tranquility and both

3/ particularly acute analytical powers
 Throughout the afternoon I felt
 very thirsty - dry mouth - and consumed
 a lot of water. I consequently needed to
 urinate frequently I got a postural
 the psychic tension, that I habitually eat
 too much salty food.

A ~~very~~ major subjective experience was
 one of no appetite. Food tasted +
 smelled good + normal, but soon just
 went down entering + I didn't feel
 hungry.

No difficulty with motor coordination -
 could play piano, freehand action
 precise at any time. However, I looked
 inattention to future to carry out any
 task which absolutely necessary

The ~~recovery~~ ~~was~~ ~~not~~ ~~now~~ ~~into~~ ~~the~~ ~~evening~~.
 Had to go to bed, varied hypnagogic state going in
 going to bed. Slept soundly through the night
 The reversion was still present the next
 day with feeling of tension through re-awakening.
 Sleep was ~~normal~~ ~~in~~ ~~that~~ ~~night~~
 In ~~the~~ ~~morning~~ ~~the~~ ~~reversion~~ ~~was~~ ~~not~~ ~~present~~ ~~to~~ ~~the~~ ~~same~~ ~~extent~~
 The ~~reversion~~ ~~was~~ ~~not~~ ~~present~~ ~~to~~ ~~the~~ ~~same~~ ~~extent~~ ~~as~~ ~~the~~ ~~day~~ ~~before~~ ~~and~~ ~~the~~ ~~day~~ ~~after~~ ~~that~~ ~~night~~

General remarks, as retrospects.
 Some of the large quality of psychological
 state on Sunday night have been related to
 weariness from Friday when I was up
 late, having worked hard for several
 weekends + on Friday preparing for the
 dinner party on Friday.

Generally, found it an interesting experience,
 worth repeating to test the persistence
 of some of the simple experience. particu-
 larly the reversion + the lack of
 hunger

later. I think it would be necessary
 to undergo an stimulating procedure.

Therefore, a group experiment might be
 interesting although possibly the results
 would be too variable to record.
 Also, since there is an acute phase - as in
 the afternoon, it might be feasible to design
 a way to experiment with even more strong
 (mental) to interest + if desired, to study
 the form of the peak condition.

- +++ 120 → 260 12/13/77 7:00 AM [0.00] [0.25] start [1.00 → 1.00] to ++ [1:30] + [2:00] drooping + 30 mg [0:45] spastic again, more at [0:45] develop to ++ at [1:00] - tooth grit - no car during [2:00] some eye unfocus clearing + 60 mg [0:30] spastic again - broke up to ++ at [1:00] a more teeth clench [3:00] clear but unclear teeth clench into evening, after flow relaxed. Overall pleasant.
- ++ 140 mg 12/27/78 combination CN 100, CR. 80 11:45 = [0.00] [0.30] nausea develop to [1:00] at ++ a nausea gone. [2:00] still ++ [3:00] drooping. [4:00] back from hill - teeth clench and other jerks into [3:00] still.
- ++ 100 mg night experiment. 11:45 PM 60 mg 0:50 + 40 mg + [2:00] to ++ rice - chills - shivers. [3:15] complete wakefulness, complete inapt. [4:15 - 6:00] turned dizzy awake pulse 108 - [0:30] completely clear. Next night considerably sleep. ++
- ++ 100 mg 6/21/76 2.00 = [0.00] [0.30] aware of [0.00] developing [0:50] up to a ++ window - a little nausea, a little sensory [1:00] ++ window + that little something [1:30] stable between + & ++ [2:00] slight down - confusion on terrific but compl. wip. [2:50] rapid recovery. [3:00] pretty much out - certainly no more than ±.

+++

5/7/77. Exp. to see if sensitivity to LSD is reduced (blocked) against by pre-treatment with MDMA-type drugs - viz., the \pm of 7/4/77 at 60 μ g on the day following 100 mg MDIP and 80 mg MDMA. At [3:35] into 200 mg MDE (post-symptomatic) to be 60 μ g LSD [0:40-1:00] build up of sensory sparkle - mentally clear. [1:20] development into ++, LSD - with edge-loss of reality. This is as clear an LSD as I have ever in my life experienced. The temptation is to profane it deeper and more open with another 40 or 60 μ g. No - I am too much on the rim of reality as it is - learn to u-and-out with this [1:50] The world is dancing around me. Terrific temptation to expand the enhancement RESIST. [1:54] I am at a place, fully ++, where neither the MD series or LSD alone can get me. When LSD has to do the opening job, it pretty well takes you out - but with MDE to open things? is MDE needed - could MDMA work? Might this allow the detection of v small amounts of LSD? Lets next try 120 MDMA and 60 μ g LSD together, or slightly spaced. I am at +++ - I must resist the temptation to supplement and extend this state, but I don't want it to end. [2:40] perhaps the slight sign of drooping. at [3:00] am at ++, and resist the 40 μ g additional LSD all ready! [4:00] at full happy + - and I am not yet sure if I am glad or sorry I resisted. That was probably the most sorely tempting moment that I have ever been confronted with. At my parent + I am complete ecstatic about my experiment. [7:00] some physical residues. The dancing, beautiful, in line with everything world of the (2:00-2:30) period was one of my more +++ peak experiences. Will I ever succeed in recapturing it? Let us try 120 μ g MDMA and at about 1 hr, 60 μ g LSD. Evening - excellent sleep. no u or v

+

8/10/77 MDMA \rightarrow LSD. 120 mg MDMA at [-2:00] & v. 60 μ g LSD at [0:00] [0:30] quiet window to about [1:20] to a + at most. [1:30] no hum window - outside no better. [2:00] drooping MDMA does not do it [2:40] virtually out - the two drugs do not see one another

+++

8/19/77 MDE \rightarrow LSD 200 mg MDE at [-3:00] & v. 60 μ g LSD at [0:00] not u at [0:30] - slow and quiet development to + at [0:45] [1:05] further. from [1:00 to 2:00] very enjoyable develop to a full ++ [2:30] spectacular world - I would like to maintain or extend this state [3:00] still there [3:45] back to + or ++ - next time lets try 200 mg MDE + 60 μ g LSD together. [4:30] still vig + and happy [5:30] still aware - no sleep problems.

++

8/17/77 MDIP \rightarrow LSD 250 mg MDIP at [-2:30] & v. 60 μ g LSD at [0:00] [0:30] edge when first edge effect [0:45] slow development [1:00] up to +, still dense. [1:10] going into u or v with the LSD alone. [2:00] straight LSD at ++ [2:30] dense to u and gone, u or v edge and loss - if there is any enhancement of LSD - it is in the direction of reality \rightarrow NOT window. [3:15] drooping [5:00] drooping, not even still +. Still still I see residual. At [8:00] to bed - no sleep to [6:00]. then very good sleep. fine

Additional notes
in conversation
1/23 → 1/30

- [0:00] - [1:00] nothing, [1:15] slight window some "amphetamine" effects
- [1:45] completely "normal" but on a different level!
- [2:15] continued, "normal" reading, listening to music, phoning, telephone-calls
some development of mental sharpness, clarity.
- [3:00] lying in the sun = completely at peace, psychologically. body, spirit, soul = one
- [4:00] more reading, thinking. EST-window clear, but peaceful. "Normal". Challenge
of thoughts by asking questions: nothing special. nothing overwhelming. were balanced,
but mentally very active. u. gone)
- [5:00] lost and lonely, but controllable. Experience of "Eternity" very peaceful.
- [5:30] slowly dropping, nearly unnoticeable
- [6:00] bit → or still in? As there was no real change in the beginning, so not in the end.

alpha-A. See 219, 265.
(combined)

++ (+) 8.0 mg 2/2/78 7:30 AM (0:00) (1:10-1:20) slight awareness - status at \pm (2:00) to + or ++ -
runner - shower - eat breakfast all now - food st. heavy in stomach. - almost no
awareness, almost no LSD immediacy. (2:30) evaluate - over vs. general above (cigarette
at 1 hr with ~ 1/4 pack/day). Stop now - status \pm & \pm miss that again - latter is better
for health. Am at full + or ++ - would I push a more no. could I still drive & go
shell \pm 1600000 mg - \pm ++ at least. If this were pushed, it might well become
something different - but then alcohol would be best. Long \pm .

(3:00) - little fear disturbance - head \pm radius so so. a little sedative-hypnotic
sounds are disturbances - go outside (3:30) I have intellectual work by the balls.
So has Diane (2's) (4:00) slight drop? no. go for meal - still + or more.

(4:20) case CZ - environment without Dave had +++ at 8. Must write Anada - we have both
Robines and Holmes alpha. (5:15) st. recovery. orange is excellent. to hell \pm
smoking & drinking. (6:30) back to \pm - the slight return of the shower. (6:00) -
long ~~talk~~ talk \pm 1 hr back to normal? head full sense. (7:00) drive to Club -
still some return. lies in S.F.! (10:00) still not certain I can cut sleep OK. 1 hr fine.

++ 10 mg 5/21/78 (AB+BB at 8 mg each) (Holly+Keller \pm MEM,
20,30 rest) - 4 hr max. ++ but DA+DB inhibited this Rx.
Repeat 5 DA+DB True alpha, but limited. DA+DB to hypnic
MEM - he, under the line until late, she ++, happy -
they contacted high \pm us until 10^{1/2} hr.

Ed + Dave (9, 10 mg 5/13/78)
interesting, deep, not intellect.
this time (balance 4- this neg)
prevalent. Physically close (to
me). 2 AM - Midnight? Acoustic
effects marvelous. evening food
was beautiful. (letter to come.)

++ 10 mg 5/26/78 (BA+BB at 8 mg each) all to extreme alpha in the 3-5 hr period. Ed joins -
inhibition of DA+DB absent. They - next day afterglow. all at +++ . Excellent - 267

+++ 12 mg 6/17/78 (AB+BB at 10 mg, DA+DB at 7 mg). Day at Kiva's Ranch. My chemistry
slow but firm (1:00) - (3:00) to +++ - good rubber \pm all, esp AB who had an excellent
experience. He felt that "enhancer" was an appropriate term - anything that was to be
done was done with exceptional capability - cerebral tasks - intellectual searching
problems to be addressed. PB was in excellent control. AB had about 20 minutes
of Kirk at ~ (3:00) \pm AB observing. Kelly was, as always, below the line, but
was also verbally far out at the same time. All still very ++ or so at (2:00)
Astr! no sleep problems, DB some. DA - much - into next day and through the
day with effects. Finally cleared at ~ (3:00) and slept well. Excellent day.

See Ivan Oatis
6/18/78

++ 10 mg 11/21/78 10:00 AM (0:02) (AB+BB also 10 mg) (Kelly 8 mg, DB 7 mg, also Brook+CR 7 mg)
to Smith this for day. Slow onset. Kelly notices, favorably, at ~ 1 hr - comes in
nearly, then descends into a self-critical "below the line" that persisted for several
days again. It was only at (26:00) following, no sleep - that busy assignments
ent 6 294

- ++ 2/12/78 MDPB + LSD [160mg + 40µg at 9:15 AM = 0:00] (1:30) immediate (40 to 1:00) slow development to a + (2:00) barely + - supplement c̄ 40µg LSD (2:00) to ++ (some absorption?) (3:15) stable at ++ - very open and pleasurable - butterfly letter to the Dave's (5:00) still ++, y! (6:15) still + - off to bed for TV & dinner 8 or largely out. overall + only - more LSD than super MDPB-LSD of earlier. Yesterday's heavy MDE might have made me tolerant to MDPB - or maybe the super-LSD solution is fading. Recheck both faults before becoming discouraged! + AR - retained LSD alone (p 264) - completely OK.
- ± 5/1/78 MDE + LSD [200mg + 20µg + 60µg] [MDE at (-1:15) 0:00 - 20µg LSD (3:15) + 60µg LSD slightest if any effect - rel. imp. to sleep at (5:15) - good sleep, overall ± or + at most. This is consistent c̄ 2/7/78 (p 256) and manuscript c̄ 8/11/77 (p 247) 8/19/77 history here, 60µg on previous day, ∴ too tolerant, excellent.
- ++(+) 5/19/78 MDOH + LSD [70mg MDOH at (-1:45, 3:30)] 40µg LSD (0:20) start (0:50) develop quickly to a strong ++. Driving very different - buying sandwich in fast store! - some unusual feelings plateau at (1:00 to 3:20), gradual evening possibly more window like than LSD - and definitely > 40µg response - maybe ++ at max.
- ++ 5/31/78 MDOH + LSD. (80mg MDOH at (-2:20)) (0:00) ^(60µg) (0:40) start, to +, nice (1:00) pure window - beautiful - at ++ (1:40) still ++ easy erot. (3:10) drop to + (4:00) out. This also (like most MDPB, connects LSD at modest doses, to windows. (good enhancement.
- + 5/22/78 2-CB + LSD ^(60µg) 5/22/78 at (-1:30) 25mg 2-CB (0:20) threshold - light & nice (0:45) still ± (1:00) + at most - then downhill. inhibition rather than potentiation.
- ± 5/27/78 26-A + LSD (24hr fast 10mg alibh-a) 60µg at 9:00 AM (0:00) (1:00) slight effect not yet to ± (3:00) at best ± (5:00) completely clear. Complete breakthrough.
- ± 5/7/78 1-0-DMS + LSD (24hr fast 4mg 1-0-DMS) 60µg at 2:50 PM (0:00) (1:00) maybe ± (2:40) completely clear. Obviously refractory.
- +++ 11/20/78 ^{MDPB} MDPB + LSD (2hr. prime - 160 MDPBATS, 80mg ADRBB; 60µg LSD (0:00) (10:30 AM) (0:5 to 1:20) develop to ++ - no dishes (1:30) to (3:00) ++ - slight + state - lots of close but lit. but I could do something without consideration of consequences. window (4:00) to ++ (5:00) 1st drop gradual decline (10:00) to a + a graceful afterglow 2nd modestly 2nd enjoyment. (12:00) still a little remaining. Beautiful experience. The ABB out gate when I was, but definitely more and richer than LSD than, +, s. To be updated. just LSD, then c̄ 160 ~~MDPB~~ MDPB + LSD.

++ 60 yg 9/19/78 ~ 11:30 (0.00) CV 60 yg proper class - gone & store collection - here back CV - frightening reality loss, recovery of "patches" - short time to flute music - largely out at (7.00) - extremely well resistant - we ++ at most, she ++ + more

++ 100 yg 2/3/79 ~ 11:00 (0.00) AB, CA 100 each. middle development (0.20) to (1.15) - excellent plateau - no reality loss - ~ but less than full alpha-1. CA is more concern on negativity of development at (0.50 - 1.00) - then excellent. Very gentle taper off from (4.00) until (12.00). AB into next day excellent. Overall ++.

+++ 60 yg 4/24/76 next experiment (11.00 AM; Ed initially 3, ATB 0.0). Both, little 2 (web. both + 2.00) at ~ (1.30) - develop to intense interaction - sexual play excellent, then ED → at. Then my Cindy, ED vivid simultaneous living of a dozen roles, each & we did a curious mix - intense interaction - fear (A.B) of fixed web state. more. for her & the subject of living roles - fruitless negotiation - intense grief. down (2.00) goes some ... to bed & eat. strange unweb next day. The ED's face is notable changes ... a breakthrough, certainly overwhelming for ED. Completion of cycle.

this circle, still the "intelligent" observer, who knows that all this "using" has been using is using the water for its purpose. Suddenly during the experiment, talking about subject, I noticed that I am also included in this cycle by drinking water (my body is ~ 80% water) and evaporating it for ex. So, I am a part of this circle, the water is using me - as I am using the water - for its purpose as a little hot sun.

Another phenomenon: I noticed a separation of body and mind. During listening to music and sitting with my body on the couch I was with my perception organs - the ears - with each one in front of the boxes, no space in between the music came directly into my ears and I was dancing with each note in the space of the room. This happened in a totally un-frightening manner (totally without the LSD-spirals), still calmly sitting on the couch. I never experienced such a peaceful flight of lightness. I experienced each nuance of a note even in such a way, that a single note on a single string of a guitar had the ^{same} sound in its resonance as if one would play all strings together with one touch. I am convinced now, that the first constructor of this instrument build it this instrument in the ^{known} manner for such reason.

One good step forward for a substance which is ^{very} good to control, but which has power ^{for} ^{creating} the "unthinkable". In this sense HH , from the intoxication state of mescaline H

-2-

So with my life? and was told, simply be yourself. It was almost 1-1/2 hours. I was feeling more discomfort than the last time, sore stomach squearishness and some tension. Christian felt full in the experience, and reported she didn't want any more. I decided to take a supplement to see how it would affect my discomfort. Carla was feeling good, but her vision was blurry with some trouble focusing. She decided to take more also. Then Christian decided to join us, and we all took 20 mg more. Soon after, my discomfort faded away, Carla's blurry vision disappeared, and we all went outside. Everything immediately sprang to life, and was fantastically beautiful. Christian was enjoying it immensely. We went around looking at flowers, Christian showing me things I had never seen before. I realized I had never really looked at jasmine before, as well as the incredibly beautiful orange flowers. We sat in the patio, feeling great warmth and euphoria, and stayed there until the sun went down and it was too cold to be outside. We had marvelous communication, felt extremely close to each other, and felt quite blessed for the marvelous experience. Food again tasted wonderful, and we kept visiting pleasantly and talking very openly until 10:00 p.m., when my son and his wife arrived and some other people and another party started lasting until midnight. Christian looked beautiful, and opened up significantly. She reported the following for the record:

For some time she has been taking mega-vitamin C and pears tea, as well as 3-4 grains of thyroid a day for several years. She stopped taking thyroid 2 days previously so as not to interfere with the experiment. Her pulse without thyroid is usually about 50; the thyroid brings it up to 72. She noticed that this experience increased her heartbeat to 80. At the height, I noticed my heart was beating faster also. She got warm this time, but was not uncomfortable as with the hot flashes of the time before. Her skin felt moist and soft. She reported acuity of vision, hearing, smell, and taste, and no unpleasantness.

REPORT OF RESULTS WITH MARIJUANA

From Kelly

January 30, 1976. First experiment was January 26. This one was repeated at two dose levels, 100 mg. for Carla and 140 for me.

3:00 p.m. Start.

3:10 I can feel slightly.

3:12 I can feel some euphoria. Carla says things are looking better.

3:20 I feel it coming on strongly; Carla reports slight tingling. Her feelings of apprehension of her mother. Feels elevated pulse. Greens are very green.

3:25 Carla thinks she is going into phase II, 1/2 pleasant, 1/2 not.

3:28 Carla reports tingling, buzzing, unpleasant. I see her face distort, but realize this could become a judgment, so look up into the beautiful blue sky and am aware of a higher level.

3:35 Carla says discomfort is tapering off. Fingers are tingling.

3:50 Not ecstatic. She is afraid of our being found out.

4:25 Discomfort has passed; Carla is getting a glow.

4:50 Carla has trouble focussing. Glow comes and goes.

5:40 Very relaxed. We have a very relaxed, enjoyable evening. Effects taper off gently, leaving us in a very pleasant state, much more alive.

April 30, 1976. Carla and I started at 1:00 p.m. with Christian. The three of us each take 100 mg., I take 120. This turns out to be the most pleasant of all experiences for me, euphoria coming on and steadily rising to a high peak. My experience was also totally pleasant for Carla. Carla begins to feel nauseous, goes to the bathroom and throws up. Feels a little better. She sits on sofa, has very hot flashes, very hot, uncomfortable. At peak, we go outside, I find nature brilliantly alive and fantastically beautiful, the most beautiful I have ever seen it, with tremendous euphoria. The love among the three of us is extraordinary. We sit outside for a while, and have very open communication. Then Christian sits, the light is too bright, and we go inside. She is now feeling good, but wants to take it easy, not too much light. We converse very openly for several hours, with a marvelous feeling of closeness. We all come down very smoothly and gently. At peak time, no one wanted to take a supplement. We visited freely and easily till dark. We ate a delicious soup Carla had prepared and enjoyed it enormously. We continued to talk very enjoyably till bedtime, when Christian departed. The three of us had never felt closer.

June 9, 1976. The experiment with Christian was repeated, starting at 1:00 p.m. with the same dose level. The session developed nicely, and no one felt any discomfort. Christian preferred to sit with her back to the outside light, looking at the softly lighted interior, until things began to become more colorful. She then chose to withdraw and close her eyes and look inside, at the color. She then chose to withdraw and close her eyes and look inside, at the color. She then chose to withdraw and close her eyes and look inside, at the color. Carla's and my interest in going outside. We sat with her inside for about 15 minutes, when she came out of it. She later told us she had seen, that she had

REPORT OF EXPERIENCE WITH "DM"

Date: September 6, 1979

Participants: Greg, Elizabeth, Tatiana, Holly and Kelly

Background: Greg & Elizabeth were visiting for two days, so the participants and Tatiana arrived for a visit. We spent a very pleasant day visiting, but not feeling well. She reports that she was suffering from depression, anxiety, and felt exhausted, -completely below the line. Greg advised her to try, and suggested that an "DM" experience would be helpful. All agreed, and Tatiana had been hopeful that she would have an opportunity to repeat the experience, as she had gotten so much from her first one. So the experiment was arranged on the following afternoon, after the practical matters of the arrangements had been completed, including the weighing of the doses.

2:20 p.m. All inhaled 120 p.p. of "DM" except Kelly, who started with 100 p.p.

The experience developed nicely for everyone. It was a perfectly beautiful day, the air nice and warm, bright and sunny, with marvelous visibility and the colors of fall showing on the mountains. We walked around the property, and enjoyed the beauty of the surroundings. After an hour we returned to the house and sat outside on the deck. By this time, everyone had blossomed and started to sing. We were feeling marvelous. Kelly became deeply relaxed, and all of her troubles melted away. Everyone's faces became soft, young looking, and took on a "happy" look. The experience seemed particularly rich and deep.

3:50 p.m. All took a supplement of 40 p.p., including Kelly. This is the highest supplement she had taken. The experience continued to deepen for everyone, and we had a marvelous time being together, sharing each other, and feeling the beauty of our experience. We felt a particular blessed group, so we all fit it all together. We could not get over how effective this event is in dismissing everyone to drop their concerns, complete relax, and feel the deep warmth of their faces being.

5:00 p.m. (approximately) We moved inside to listen to music. First we listened to the Orie Lyric Pieces, which we listened to in its entirety (45 minutes). We were extremely at peace, the music was outstandingly beautiful, and we were all in all in going much deeper within ourselves. We felt the experience to be particularly profound. Tatiana left during the music to visit a relative, and came back later. We ate lightly, soup and bread, and got it very comfortable, adequate and satisfying. Then we listened to Tatiana sing on the piano, the guitar, and it seemed also very transcendent and sustained the experience.

The afternoon the next day seemed particularly outstanding. Everyone felt it had been a particularly moving experience, and it was difficult to get up. Kelly was totally changed and had risen completely above the line, and she had been since.

Kava-kava root (fresh)

± 9/30/78 About 10 g of fresh root cleaned & shot into a mortar (1 g. in 5 ml. AC, DN two others there) and \bar{c} water decanted into glasses & drank it. There was a modest awareness of change, \pm at most, for maybe 20-30 min. AC (this is a subsequent try) quite intoxicated same amount - although his first try also was marginal.

+ 10/31/78 10 g (280g) cleaned up and then ground in mortar & lots of saliva - water added, drunk at 2.30 PM = [0.02] at [0.20 + 0.35] definitely enough intoxication to give +. gentle recovery. Intox not too well defined - alcohol-like? Remaining 24 g ground up & saliva in then diluted \bar{c} ~ 2 & tho. Extracted \bar{c} ethal₂ \rightarrow orange extracts. Bad milky emulsions.

- ++ 7 mg 10/20/75 in gel. capsule 8:30 - (0:30) (0:30) something, by (1:00) good development to + or ++ (1:30) good ef but largely univalent (2:30) still ++ - basically not a pleasant place to be in. Quite neurotic - inwardly turned - some feelings of despair - considerable eyes-closed activity - with some night be considerably more reinforcing. (3:00) a real and abbreviated ebing of the apathy and unpleasantness. My mood might have been negative. This is basis for comparing with 4-OH DHP, but this will have to be repeated. There was some visual lightening of depths of lights and darks, and considerable eyes-closed imagery.
- ++ Strong dose P. curassavica. 2/16/79 12:50 - (0:00) (AB, CA) +500 cal. AS. dose v (0:45) decline to weak ++ at 1:15 - time (abatement) to (2:00) extremely restricted. visual inhibition more steroidal - some motor problems. AB. at ++.5 CA extremely quickly (some nausea) - see v ++. gradual decline through the rest of the afternoon.
- ++ 15mg PScP 3/24/80 AP \equiv 7:40 PM = (0:00) (1:15) (1:25) start. to a good ++, AP to more. few notes. AP residual good dreams v 2 weeks.

brought him away from his anchor at all - full sleep next night - in 3rd day still depressed for internal reasons. EN had much visual movement, but some stomach problems at (2:00-5:00) and leg twitching persistent to (29) and more. P.G. excellent, dose perhaps too light. All of us were considerably more reflective and inward-turning than in earlier aleph-4 tries. My microphone approached slowly and subtly - I was at ~ (3:00) and still evident at (12:00) full sleep - next day much energy, rest work, but repair, roof cleaning - at the K's house. Less intense than before - fine a ++.

+++ 11 mg 11/20/79 7:00-10:00 AM (1:00) slight awareness (2:00) talking - subtle development (3:30-5:00) within range of interlaid conceptual loops - on vol. p 300 - 7:00-10:00 no appreciable awareness - interactive movement notes - more of sed. → aware. but different sleep. certainty +++

++ 12 mg 10/19/79 7:30 AM - (0:00) AP E. (1:00) aware - again subtle development to (4:00) - eating normal but light - involved conversation - I to barely over ++ - v. troubled sleep - none 'til (10:00). AP to +++ or all less - residues through ~ (10:00) - lighter reaction than expected.

REPORT OF EXPERIENCE WITH "NDV"

Date: August 20, 1978.

Participants: Holly, Tatiana, and Zeke

Start: 9:50 A.M. All participants ingested 100 mg.

10:10 Everyone is beginning to feel effects.

10:30 All are feeling strongly. Tatiana feels that it hits her very suddenly. We had started in the living room, where there is lots of light and excellent view out of the windows, and a lot of interesting things to look out around the room. But when we stepped outside, it seemed to come on stronger.

We took chairs down to sit under the cottonwood trees, which were most pleasant. A nice breeze caressed us and whispered in the trees. The scenery was magnificent. At first everything seemed too bright, but as we accommodated ourselves to the brilliant sunshine, we began to observe the marvelous detail in the mountains and across the plains. The desert foliage was most interesting, and remarkably different from plants on the Coast. Holly felt heavily intoxicated. She had been extremely tired and tense the night before, with appreciable pains in her neck and shoulders. She felt the experience was a great tranquilizer, and her body felt numb.

11:20 We take supplements, Tatiana and Zeke, 20 mg., Holly 10 mg. (the balance of our supply). Holly was feeling so heavily intoxicated that at first she thought she would refuse the supplement, but when she learned the distribution of the remaining capsules, she opted for the 10 mg. (I had originally planned to take the 10 and give the girls 20.)

Tatiana sailed for 3 hours with the experience. At the end of three hours (12:50 P.M.) she suddenly came out of the spontaneous experience, and began corticalizing about her work and life situations.

I experienced considerable enhancement of perception, but was not as completely into the experience as I have been with larger amounts. I experienced a great deal of cortical activity, similar to what I am more used to with LSD, which I have never experienced with this compound. This was partly the result of our not being too talkative, Holly feeling very relaxed and Tatiana and myself enjoying our experience. I keenly felt the absence of our former companions on this journey.

After the supplement, we walked around the property for a couple of hours, feeling very content, relaxed, and enjoying the beauty. At first we felt so relaxed we didn't feel like walking, but once we started it was effortless. It felt very good to walk around and look at things.

2:30 We come back to the living room, all feeling very languid. We sat around and talked for a while, and then Holly and I took naps in which we slept very peacefully. Tatiana read a while, and then took a nap.

Later in the afternoon, we took showers, which was very refreshing, and had a delightful visit with our neighbors, the Zinas. For my birthday, they took us to dinner at their restaurant, where we had a late dinner. Tatiana ordered a steak, which did not sit too well with her, and that evening had an attack of diarrhea, and her stomach still bothered her the next morning. Otherwise, everything was very pleasant. We enjoyed the Zinas very much, and were very content and peaceful. Holly was really relaxed and no longer pushed by the compulsion to clean up the house immediately.

REPORT OF EXPERIENCE

Date: October 21, 1978

Subjects: *Carla, Elizabeth, Greg, Manela, Sandy, Sasha, Kelly*

Ingested: Aleph 4, 7 m.g. for *Carla, Manela, Sandy*, 8 mg. for *Kelly*, 10 m.g. for *Sharon, Bob, and Sasha* (I am sure of the 7 and 8 amounts, not so sure if 10 is the right amount for the last 3.)

Time: Experiment started at 10:00 A.M.

I personally felt in the best shape for this experiment than in a long time. We drove to the hiking area we have dubbed "Uriah's", because it starts up behind the house that *Grockit* built. As we got out of the car and started up the hill, I was feeling quite good. This was some 40 minutes after ingestion. I remembered that with my first Aleph 4 experiment, as soon as I felt any affects, I felt uncomfortable, and the discomfort grew as the affects became stronger, along with the enhanced perception. This time I felt euphoric with the first traces, and was confident that I would head up into a pleasant experience, and reported so to Sasha. As we climbed up the hill, 1 to 1-1/2 hours in, the euphoria grew, as did the beauty of the surroundings.

Around noon, we settled into a little valley with a magnificent view of the surrounding countryside. I was feeling the effects much more strongly, and was beginning to get a trace of discomfort. I was aware of the beauty of our surroundings, and noticed some visual hallucinations when looking at homes on the hills across the valley, in the form of smoke trailing across. I lay back and looked up at the sky, and the sky and clouds were incredibly beautiful. I sensed my pain as my inability to accept such fantastic beauty--it was as if it were more than I could bear. I became aware of how my cybernetic system is accustomed to joy, and felt how grand it was to let joy creep into the various corners of my being. I felt Sasha's greatness next to me, and how wonderful it was to have the opportunity for such experiments.

I thought the experience was progressing nicely at this point, but unfortunately the discomfort continued to increase. It felt good to lay back and watch the sky, and close my eyes. With eyes closed, I had some marvelous imagery, which most often took the form of various plastic shapes imbued with color. At times the colors reached intense brilliance of magnificent beauty. Yet nothing seemed to relieve the tension that was building up, and continued to build up throughout the afternoon.

The rest of the afternoon, there were many experiences of great beauty, but I was always pulled into the great pain I was experiencing, and could not get free of it. I regretted asking for an additional m.g. of dosage, and felt I had too much, but saw nothing I could do but ride it through. The experience was so intense I felt I could do little to direct it, but just flowed with it. It was hard to get my analytical mind to work. This showed up most strongly when I took a little walk aside with Sasha, and he computed the directions by the position of our shadow. I could in no way make my mind follow the reasoning to establish direction. I simply went blank, and was astounded by my inability to think.

The affects continued well into the evening. Going down the hill, I felt at maximum intoxication, and at some moments had very beautiful experiences. They would lift me out of my pain into intense enjoyment, then I would subside back into

the pain. In my first aleph 4 experience, the late afternoon and evening were glorious, but this time the tension held on right through the rest of the day, the evening, and even through the night. It was not until the next day that I felt relaxed, euphoric, and at peace.

The pain I felt all afternoon and evening was the result of experience the blackest side of my life. It seemed as though everything I had done was totally wrong, and I could only see the back side of everything: my marriage, my move to Lone Pine, my withdrawal from life. I experienced myself as completely empty, just being a parasite on others, constantly taking and contributing very little. Such simple acts as tending the fire and washing the dishes brought temporary relief from such feelings. I felt all my major life decisions were wrong, and yet I could see no way out, as I had boxed myself in by reducing my income, and moved into a simple life style which I had no way to reverse. The thought that my activities at Multi-Media were no longer needed and I must find another source of income was extremely frightening. And the extreme irony was that I was supposed to be a proponent of higher consciousness, and man's limitless abilities, and yet I could find nothing but emptiness in myself. I wanted to crawl back to Lone Pine and die.

During the night I churned and churned over these issues, and came to peace with returning to Lone Pine and becoming a better partner to *Garia*, if she really wished to return with me. I could see that my dissatisfactions were my unwillingness to face unsatisfactory areas in myself, which I resolved to correct. One of the main elements here was to stop using her unwillingness as an excuse for me not to do things which I know in my heart should be done.

The following day was by and large a day of great peace and warmth. It was marvelous to be with the rest of the group, and I was still quite open to all of the surrounding beauty. Plunging into such activities as giving *Kojak* a bath with total un-self-consciousness was a great joy. I could see and appreciate the wonderful qualities of all the other group members.

During the next few days, anxiety returned many times, and it took time to totally wear off the tension. However, I began to learn ways to dissipate the pain. This is primarily by instead of allowing myself to be blocked by the pain, to turn it around and see what can be done. There would follow a flow of creative ideas of many alternative actions, which felt very good to see. I learned the importance of once seeing what needed to be done, to move quickly, before lethargy sets in, as the moving and acting releases new energy.

The drive back to Lone Pine was a very beautiful one for both *Garia* and myself. It was like having another good experience, as we were both wide open. We had much energy, and were not tired from the long drive. We both felt very good to be home again, and we have much new energy and insight.

30

REPORT OF EXPERIENCE WITH MDMA

Date: November 11, 1978

Participants: *Tatiana, Carla, Kelly*

Dosage: *Carla* 100 m.g.; *Tatiana* and *Kelly* 120 m.g.

Initial ingestion was at 12:40 p.m. The experience continued smoothly for all. It was a cold and stormy day outside, so except for one brief interlude for *Kelly*, the participants remained inside all day. For the first two hours, the sun broke through the clouds so it was pleasant in the living room. When the cloud cover became more solid, a fire was started and maintained through the day and evening.

The affects weren't noticed too much at first. I notice only slightly after 1/2 hour; I wonder if I am getting somewhat immune. The mountains, with some fresh snow and cloud cover, are very beautiful. After about 40 minutes, I become aware that I am carrying a great burden. It is not unpleasant, but interferes with the free-flowing intoxication often previously experienced. It gradually subsides as I pay attention to the beauty around me.

2:20 p.m. All take 40 m.g. supplement.

We are all feeling very good, very relaxed. *Kelly* and *Tatiana's* faces turn very soft and very beautiful. We have very free, very open discussion. *Tatiana* is particularly insightful and responsive, seeming to know exactly what we are saying even as we form the words.

I take the dogs outside. It is sharp and clear and cold. I am transported by the beauty, particularly the wonder of the clouds and the sky. I feel the enormity of this research project and its potential meaning to mankind, how marvelous it is to be able to have such an experience, and I feel most grateful to be a participant in such a glorious movement. I am aware of *Sasha* and *Greg* and how marvelous it all is.

I enjoy the outside beauty and freedom for about 20 minutes, then feel called to rejoin the girls. It is extremely pleasant around the fire, feeling our closeness and enjoying the flames. *Carla* feels very languid, called inward. *Tatiana* plays and sings to us; it is most beautiful. I feel much energy, and readily get up to get things others wish -- tomato juice, later soup.

The experience trails off leaving us all very mellow. *Tatiana* feels tired, and we play a tape, and nap in front of the fire until we decide to retire at 9:00 p.m.

The next morning I feel light and energetic, quite different than I usually feel after using this substance. We all feel good, and have a nice hike in the brilliant clear sunshine, but somewhat nippy air. We are all open to the outside beauty.

Aleph - 4 S 11 my 8 9 my +--+
 (Nov. 26)
 Sunday, Nov. 28 78 120 pm

Walk of around Panther, Dixie de Blaney
 1 hr. first alert, in warmth of mixed desire to sit,
 not really being happy
 with the intention to write to be warm.

2 hr. Hot, sitting, talking, writing congealing into
Key.

What do you want really want to search
 for: finding and the capability of doing -
 catalysis in opening up a portion of the
 mind that otherwise is not accessible. In
 making one aware, that these doors are somehow
 accessible. "I want to find it". What it?

You hear P. Watt "This is it" found. No
 he is dead. He can no longer search for it. He
 has fixed himself to a certain conclusion. (Do we
 fix ourselves, by using drugs, as catalysts?) Yes - no!
 But Yogi - kundalini - drugs - anything - they all
 somehow congeal to our conclusions and insights.
 Ability to have the mental agility to adapt
 to new inputs and to new inputs, and keep your
 intellectual integrity at the same time...

Concept of living within two blocks in Paris:
 Being-native - has learned his, same poster
 intellectual rational knowledge, but no sense of
 of that locality. If confronted with it, without
 the mental ability and aptitude for the fact,
 confusing, and devastating inevitably.

Analogy: we are comfortable in the air, here
 to New York - but we are surrounded by
 symbol, that triggers immediately higher capabilities
 and we pretend we understand what we
 know. But if we were confronted with
 locality of what was presented as a symbol
 without the preparation of this symbolology,
 we would be dabbling our philosophy.

(→ possibility of getting used → philosophy)
 I completely convinced the these localisms of
 which we too symbols are used, and we can
 prepare for them and in this way solve the
 that way of promotion.

(completely different realm than NOTION,
 (NOT) → sensory concept of the intellectual aleph-
 concept)

Emphasis of continuation of symbolizing
 and the very specific capabilities of

Opening doors of the mind. Obsessing
more the drive for opening and looking,
than the drive for finding. finding, anticapt for
the goal and makes blind.

Being - Tendency: A thing: to write the paper
of New-Zealand, to make inquiry about N.Z., requiring
curiosity, witiosity or the necessary thing for
exploration, followed by inquiry, followed by
assimilation, acceptance, bringing into frame
of life fullness.

Analogy to our level of "historic understanding."

~~Everything is dead, they are dead~~
|| All things are dead. They are dead to us
as soon we align reality to it.

Everything that came out to be an obvious
world-shaking truth, fell apart by a paradox.

We used aleph as a verb. To ~~absorb~~
aleph the sublime futility of trying
to pin down an absolute truth.

| Concept of Transition is immortality.
Transition between the paradoxes of life and
death. Everybody who is totally in the here

And how, is static, is substantially dead
(Gropius-transcendence)

- Faces on the wall/paper: → everything is
there. We see or don't see (everybody sees differently)
All of our reality contains all aspects of
everything

both seeing and hearing, for archetypes:
synchronicity of faces face "Pharaoh" and
♀. face (lesbian). (seeing of lentanix, and angel
Sphinx, ...)

body-image: without any archetypal significance,
but face: what on the face! Reduced itself
down to the mouth: primal scream
without which there was no life

starting of life-process out of a state of being
In the there was the word and the word
was with food and (food) was the (word) =
primal scream?

concept of a hologram: multiplicity of
historical and future(?) events
but filtered in a specific way

Sanity = in factness of filter (selection
mechanism). Insanity = damage or lack

of his mechanism.

Is there a direct answer to Shakespeare's?
(Aph-catalyst a benign winter part to the

MDMA
REPORT OF EXPERIMENT WITH MDMA

Date: November 25, 1975

Participants: *Xavier and Gibboth, Zeke and Carla*

Initial dosage: 100 m.g. for *Xavier, Gibboth and Carla* 120 m.g. for *Zeke*

The chemical was ingested at 10:50 A.M.

11:05 *Carla* reports getting tingly, excited, I feel some euphoria

11:23 I feel intoxicated, much more than in recent experiments

11:25 *Xavier* feels real strong, *Gibboth* feels nothing, is worried that it won't work because she takes so many different drugs that she is refractory, and will need a lot more.

11:35 *Gibboth* finally feels it strongly. She lies down on the floor, is tingly.

Her face is quite drawn; she experiences many conflicts. She doesn't want to discuss in front of *Xavier*. *Carla* encourages her to move out to the back patio in the sun, and stays with her. *Xavier* and I go for a walk out front.

It had been -totally overcast and rainy all week, but today was a beautiful, warm sunny day, with fascinating clouds in the sky. *Gibboth* is very happy to have *Carla* to talk to, and has much confidence in her, after several days of their visiting together.

I am quite impressed the way *Xavier* has expanded. I feel him strongly, in a very euphoric way. He looks younger, relaxed, he feels good. We walk through the unusually beautiful neighborhood he lives in -- beautiful homes set well back with lots of separation, beautifully landscaped with many trees and bushes. The area was originally a beautiful pine forest. There are few areas so nice in the country, and this was a particularly beautiful day. *Xavier* notices the beauty, and comments how he never allows himself to enjoy a day like this, but bogs himself down with work. He feels two very strong wave of drug action, not unpleasant but not pleasant, but overwhelming. They pass, leaving him feeling good after the wave. He notices that his back, which has been bothering him for several months, does not hurt as much, and we walk much further than would ordinarily be comfortable for him.

12:20 Supplement time. We return to the girls. *Xavier* does not want the supplement, but all else take 40 m.g. *Gibboth* has become to come out of the deep state of conflict she was in, and notices how young and relaxed *Xavier* looks, and how bright his eyes are, without their usual glaze. She asks us to leave her with *Carla* again, and *Xavier* and I continue our walk. I am having a glorious experience, feeling very good with *Xavier*, and the weight of any past differences dropped away. I am pleased he is having such an excellent reaction, since he approached the experiment with many reservations.

The experiment trails off nicely, with good feelings all around. *Xavier* gets hungry and makes himself a sandwich. He wants to watch a football game on TV that he had previously set himself up for. I join the girls for relaxed discussion.

Later in the evening, we go out to eat at a cafeteria, having a nice, relaxed evening. Unfortunately, *Xavier* quickly returns to some of his established routines.

Background. *Xavier* is my older brother, 3 years older. He is an attorney in *Jamaica, N.Y.*, and has established an affluent lifestyle. He is totally dedicated to his work, and cannot seem to extricate himself from it, although he claims to be trying. Louise has deep-seated emotional problems, and has suffered much from his neglect, especially now that the children are growing up and going off to school. They have three lovely children, amazingly bright and intelligent and except for *Raul*, the son and youngest, very personable. Both girls are now away at school. *Raul* is extremely competent both athletically and scholastically and is somewhat withdrawn, but is coming out of it (he's 14).

Gibbo has always been interested in our psychedelic studies, and has wanted to participate. There never has been a good opportunity, and I have been reluctant since *Xavier* is very conservative and very resistant to the whole idea. I was surprised and pleased after our discussions on this trip, when we had more time together than in many years, that he was receptive to the experiment, although he had many reservations. I was consequently quite pleased when he had an enjoyable experience, and was open in many ways to looking at his lifestyle and relationship with *Gibbo*.

14.1.79

Denise is my }
 Bunny is my } ++ - ++

10 min after intake best effects: getting started, back of concentration
 while reading colt

10 min - 18 min: Platform

300 min no effect anymore

visual: light oscillating edges, "breaking objects - strong
 motion (for Denise), no colours

auditory: isolated sounds stronger, more "dark" ~~and~~
 no affection to "you" & "the music" like to have
 strangely isolated, does not affect.

taste and smell normal

tactile much enhanced without going into pleasure
 emotional dullness

body-feeling: material clarity, strong awareness,
 however feeling more like a "shaking potato" than
 like a "glowing ball" (Denise)

difficult in matter, despite of enhanced feeling,
 no longing to stick for "building": no atmosphere,
 no attraction, but if building would adhere.
 Awareness of density ~~and~~ but in tolerance.

(intellectual insight the "matter" does not bring more insight-
 (more))

2-08 Dave; ED

309

A summary of the text

Dave is standing in the living room, experiencing everything in motion. The water to the kitchen, the windows glowing, things, pictures, flowers: he is in a boat, in high waves (COULD separate) At the same time Ed doesn't see any motion outside, but feels himself being in any structure with the legs stretched out to the length of

Dave: whole experience, his own movement + all surrounding
with movement.

Ed is only feeling his own movement / in space, in the body, like a motion that could be used in space to jump, at the moment when she tried to see, or imagine with movement as well, she vomited (really)

clear sport, but somehow blocked: the skin is somewhat felt and so is the frustration of the sport, waiting at the top for instructions. The most funny ones, completely empty: but was but deep to this depth - probably quite different: no free play but only blocked to material: as you see or touch something and strange, perhaps a funny image's own. (confirmation of anti-aleph).

in the head part of the plateau extremely relaxed
but also mood extremely funny, being with, left walls,
games, a social fun.

- The 'breaking of logic', experience of paradoxes
→ an aliph property
e.g. ^{Bunny} told Denise that he behaves as a teacher
in this moment she realizes that with this sentence she is the teacher.
- ^{Bunny} experiences an (her) intellectual driving force.
Everything felt has to be understood, structured put into
a system. Close interaction between feeling and thinking.
- ^{Bunny} in the dark room: "I see so clearly that I do not need
light"
- Truly thinking, - holding: form impression, yin + yang.
Hidden understanding of the symbol
The own body, bs can be seen (felt), is light colour.
The other body (can not be seen, only the edges touched; and
flour touched: dark colour.
- some associations: atmosphere ^{of the universe}: aha: field of energy →
1) "Atmosphere happen" = to make some atmosphere
e.g. in a room ^{or between people} rather than lighting a candle, or
pouring a glass of wine one should be open for
letting the flow of energy = atmosphere over
2) bio logisch, biological = aha' bios logos
the bi-supplementing system is natural, logical.
mono-logical does not exist.

- to see with the body (2-65)
- to see with the head (normally)
the head is on top of the body, the head ^{oversees} ~~controls~~ projects the body.

In general a most interesting experience:
some sleep, some ² ~~conscious~~ ~~disorder~~,
and others, specific.

not the transcending, universal power,
a very earthly, limited feeling
the material - doing, with some intellectual or effects.

(Antraleph)

- the experience of writing: horizontal and interesting:
the pen, is dancing mountains on the page, and descending
and flying and and and
Schreiben, a dance!

REPORT OF EXPERIENCE WITH MDMA

Date: January 25, 1979

Participants: Carla and Zeke

Dosage: Carla 100 m.g., Zeke 120 m.g.

Start: 9:30 A.M.

8:50: I feel slightly. Am more aware of internal processes with the smaller group.

9:00: Carla reports that eyes are out of focus. This has been a common reaction. I wonder if the relaxing effect of the chemical isn't relaxing her eyes. I ask her to try her glasses. She sees much better with them.

9:05: I feel a stronger wave.

9:07: Carla begins to feel effect--a lightness, about to drift off.

9:15: Carla goes to the bathroom for the 3rd time. Feels cleansed, purged, relaxed.

9:17: I feel a little dizzy. The Jehovah's witness representative arrives up. Carla handles her nicely and she leaves.

9:40: We are deeply into the experience. Carla feels very introspective, and is quiet. I look outside at the clouds, the beautiful mountains. I find the quiet leads to a far different kind of experience, such more like LSD. I see much imagery and great beauty in the clouds, and experience profound realizations.

10:10: We both take 40 m.g. supplement.

10:20: I go outside, bundled up well for the cold. It is a clear cold day, with beautiful clouds hanging over the mountains, partly scattered. It is like stepping into a whole new world. Everything lights up, and everything is profoundly beautiful. I feel the very deep love I have for this country.

Back inside, Carla and I have a quiet, relaxed time. She is very soft and beautiful, and reports the same for me. Mostly we spend the time in quiet, listening to music. We have a discussion about teamwork. The afternoon passes surprisingly quickly.

3:00 p.m. We are enjoying the experience enormously, feeling extremely relaxed, euphoric, and renewed. I feel the intoxication is over, and quite normal, yet unusually good and open, and my body very light. We drive to town to mail some letters that must go out in the afternoon mail. The ride is most enjoyable, and the scenery and change of view is marvelous. Back home, a walk with the dogs finds ~~with~~ body extremely light and energetic.

4:30: We watch sunset approaching, listening to Ravel's Daphne and Chloe. We stand at the dining room French door entranced. The setting sun lights up the clouds over the *tsit's*. The cloud formations and the music are simply superb. One huge cloud looks like the spaceship from "Close encounters . . .", with all of the feelings of other, more intelligent life. We are spellbound until the music ends. A perfect ending for a perfect day.

2/12/79

REPORT of EXPERIENCE WITH 2-CD

This report is to record some of the highlights of my first experience with this substance.

I inhaled 25 mg. on February 9, 1979, in the company of Holly, Greg and Elizabeth, Nevada and Sandy, Jake and Sasha.

The experience developed very nicely and smoothly, and remained an exceptionally smooth experience throughout the day. It was not a particularly intense experience, and it no doubt would have been more so at a little higher dose level, as reported by others. However, it was a very enjoyable experience, and I felt such closeness and warmth with all the others.

Probably the most dramatic effects I noticed at several hours into the experience observing the rainforest in the living room. There are two plants that have a lot of very dark leaf growth. The dark areas lighted-up and became white in a way that I had never seen before. I was aware of very subtle differences of shading that illustrated that the painter could very effectively communicate feeling and meaning in the dark areas, like the light ones. I think that this is where the dark areas of these paintings will be more true than the light areas, which are more obvious.

What has been a miracle about this experience on stage is the very low strength. The entire day had a feeling of deep inner satisfaction, peace, and internal strength that was most rewarding. Furthermore, this feeling lasted for several days. For the next three days I work, in spite of being very tired by many things to do, almost more than could be accomplished in the time remaining. I remained calm, confident, and worked with an easy grace that belied the pressure.

Thursday, on our drive to Los Angeles, Holly and I still felt a great emancipation of our drive that stemmed from this experience. At one point I was convinced (even more than on the day of the experience!) that I was moved to try to express it in writing.

At the meeting I attended on Friday, I felt that the inner peace and strength that I had gained contributed a great deal to my enjoyment of the meeting and the communication I entered into with various participants.

Zeke

Date: February 19, 1979

REPORT OF MDMA EXPERIENCE

Participants: *Tatiana, Carla, and Kelly*

Dosage: *Carla, 100 mg. Tatiana and Kelly, 120 mg.*

Background: *Tatiana* has been run down since Christmas, dropping in and out of the flue, with low energy, and with a raspy throat that has affected her throat and prevented her from singing (she is an excellent singer, accompanying herself on the guitar). She asked for an experience, so we set up this day in her apartment in Berkeley.

Start: 11:30 A.M.

11:40: *Carla* is beginning to feel.

12:00 *Kelly and Carla* are feeling it more strongly. *Tatiana* is cold.

12:05 We notice that the three brightly colored Mexican finger paintings on the wall are coming to life very vividly. After looking at the paintings, *Tatiana* feels strongly hit. I feel woozy. We notice that compared to the finger paintings, the Indian sand paintings next to them appear stiff and mechanical.

12:25 *Tatiana* and I feel cold and put on more clothing. *Carla* feels good being cold. It is a cloudy day outside. *Tatiana's* living room has a dark gold wall paper. I find it getting very bright and very attractive. I doubt if I will ever see it dull again. I am intensely intoxicated, probably the deepest ever. Everyone's skin has softened. *Carla and Tatiana* look radiant and beautiful. We all feel glorious.

12:35 The sun has broken through the clouds. We step out on the little balcony, into the sunshine, and observe the plants *Tatiana* is growing. It is beautiful and alive outside. The clouds are striking. I see intense, brilliant white light in the clouds that is very elevating.

1:00. All take 40 m.v. supplement.

1:20. *Carla* reports that the supplement has hit her stronger than the first amount. This may be because of her initial lower dose. She thinks she may start with more next time. Everything is dancing. She has trouble focusing. SHE is extremely relaxed. She notices some internal darting.

1:30. We are all extremely relaxed and euphoric. *Tatiana* sings to us. She plays and sings perfectly. Her voice is angelic, with no trace of the earlier raspiness. This is true in her speech also. Time passes rapidly, unnoticed.

3:00. We go for a walk in the neighborhood. It is beautiful outside, and we deeply appreciate the beautiful shrubbery and trees, and the well-kept homes.

3:40. Back in the ~~same~~ apartment, *Tatiana* feels too tired to sing more. We put on Don Quixote, by Richard Strauss. The music is beautiful. Everyone feels very relaxed, and *Tatiana and Carla* feel tired. *Carla* still reports eye darting. All have experienced some slight jaw clenching, but it passes quickly.

5:30. After eating (I am very hungry, more so than previously), we drive up Pacific Avenue high up on the mountain, with a marvelous view overlooking Concord and the Valley.

We return for a quiet, restful evening. *Tatiana* is aware how she has been pushing herself and not getting enough rest. We all feel renewed.

EXPERIMENT WITH 2-CD

Date: March 20, 1979

Subjects: Zeke and Holly

Dosage: 25 m.g.

8:55 A.M.: Ingestion, on an empty stomach. The previous day had been quite stormy, with snow and rain. This morning it seemed to be clearing, but low-lying clouds moved in, and it was cold outside.

9:25: Holly begins to notice. We have been listening to Willie's piano recording (the local valley pianist), and it is beautiful. I have felt somewhat, and have Holly enjoying the beautiful clouds. I notice I am a little dizzy when I stand up. Jean turns off the heater.

9:32: Holly is very aware of her body. It is strange, totally different than previous time with the group. Things are coming to life. I feel nauseau, but it passes quickly.

9:38: I am cold, even with the heater back on. Holly

10:03: Holly is uncomfortable. We both feel much more impact from the chemical than previous time. I feel quite intoxicated.

10:30: We go outside. It is chilly, but the sun peaks through the clouds to warm us. It is perfectly beautiful outside. Fortunately, no wind. Everything is crystal clear, the mountains are covered with fresh snow, beautiful clouds hang over the mountain. We notice that spring is bursting out everywhere, with wonderful shades of green everywhere as new plant life appears, and new grass is growing in the meadow. We notice the rocks and plants in great detail. We have a marvelous walk down to the stream, where I show Holly a pool I discovered the day before where we might grow trout. We enjoy watching the stream, and the marvelous outdoors until almost noon.

12:00: It has clouded over, and gotten colder. We notice the tremendous emptiness of our stomachs, and go back to the house to eat. I feel much energy running, but a slight upset to my stomach. We seem to have passed the peak, with the intoxication having passed, but otherwise we are feeling marvelous. Scrambled eggs taste outstanding. We are both famished. All my stomach discomfort disappears after eating. Holly felt a slight stomach discomfort after eating, and after a while it went away.

12:30 - 1:30 We still, listening to the piano music, which seems especially fitting. Iren is very much with us. We both feel a little tired, and enjoy lying down listening to the music. It is most peaceful and euphoric.

1:35 I feel a marvelous afterglow developing. We go for a stroll, and visit our new neighbor who is constructing his house. We wander about the property, enjoying the marvelous glow, which continues the rest of the day. We have a splendidly relaxed afternoon and evening. At night we enjoy quietly reading in front of the fire.

PRIMER STUDIES (4 p. 25.)

4/7/79 MDOH issue for ADA. [2:30] 100 mg MDOH $\bar{x} = \{1.30\}$ [0:00] [0:30] extreme nausea, then

THE EXPERIENCE

from Kelly

My first experience of interacting with MDMA on April 17, 1987, in the company of *Carla, Marcela and Sandy, Elizabeth and Greg, and Bunny and Susan.*

The interaction came on fairly rapidly. In about 30 minutes, I was intensely interested, and very much "high". It was a glorious feeling, and all the other members of the group looked so well. Everyone came with a marvelous story, particularly *Carla*, who looked particularly beautiful as I observed her during the day.

The presence of all members of the group was quite warm, and beauty everywhere was apparent. The house seemed very special, and a perfect setting for the experiment. Everything in the house seemed to have been very tastefully selected, and fit in beautifully. *Marcela and Sandy's* personality and coolness were reflected in their choice of ornaments and decorations.

Outside the sunshine was marvelous, and all was lush with the beauty of growing things. The view of the bay was inspiring, the sky and clouds were beautiful and peaceful.

With eyes closed, it felt marvelous, and it was quite appealing to pursue inner experience. However, because I had seen so little of the others in past weeks, I preferred not to withdraw, but to stay in contact.

I did notice an internal dryness which was characteristic of MDMA. I had a similar difficulty in urinating, but not as intense as with "TM".

About mid-afternoon, when I walked barefoot on concrete, I was amazed to feel the concrete as soft and textured. I had never before experienced such liveness through my feet. This has stayed with me to a good extent.

Our walk around the block with *Marcela and Sandy* was a marvelous experience. Everything was so rich and beautiful, and conversation so pleasant and easy, although drinking in the beautiful conversation.

The experience held on through the evening. By dark, there was a little tension developing similar to the after-effect of amphetamine. It would have been welcome to lie on the floor and listen to music and relax, but again I did not want to give up the contact with the others.

I drove home, and the early part of the drive was beautiful, and flowed effortlessly. However, by the time we got back, I was beginning to feel tired, and welcomed the opportunity to go to bed. Sleep was numb and dreamless.

The next morning, I felt extremely detached and tired, like a zombie, very much like the morning after my first "Ment-B" experience. I was extremely content and relaxed, nothing bothered me, but activity was an effort. I did yard work, having to rest frequently, but enjoying it immensely. That night at a party I had a wonderful time, and felt very free. However, for the next 3 days at work, I felt washed out, and had a real-time concentration on my work. I would have loved to flake out in the sun. On Wednesday, my energy returned, and I felt better than ever -- peaceful, calm, detached, and able to focus on the present. Our drive back to *30 Kelly* was beautiful.
